

PM-KUSUM YOJANA GUIDE

Pradhan Mantri Kisan Urja Suraksha evam Utthaan Mahabhiyan Gautam Solar Beneficiary Handbook 2024

Overview of PM-KUSUM Scheme

PM-KUSUM (Pradhan Mantri Kisan Urja Suraksha evam Utthaan Mahabhiyan) is a flagship Government of India initiative under the Ministry of New and Renewable Energy (MNRE). The scheme aims to provide energy security to farmers while decarbonizing India's agriculture sector. It was launched in 2019 with a target of adding 30.8 GW of solar capacity by 2026.

Scheme Components

Component A: 10,000 MW Decentralized Ground / Stilt-mounted Grid-connected Solar Power Plants on barren/fallow land by individual farmers, cooperatives, panchayats.

Component B: Installation of 20 Lakh standalone solar-powered agriculture pumps for off-grid areas where grid connectivity is not available.

Component C: Solarisation of 15 Lakh grid-connected agriculture pumps. Farmers can sell surplus solar power to DISCOM.

Eligibility Criteria

- Individual farmers owning agricultural land
- Farmer Producer Organizations (FPOs)
- Water User Associations
- Farmer Cooperatives
- Gram Panchayats
- Primary Agricultural Credit Societies (PACS)

Financial Breakdown

Component	Central Subsidy	State Subsidy	Farmer Share
Component A (Grid-connected plant)	30%	30%	40% (loan available)
Component B (Standalone pump)	30%	30%	40% (loan available)
Component C (Grid-connected pump)	30%	30%	40% (loan available)

State-wise Implementation Status (2024)

State	Target (MW)	Status	Nodal Agency
Rajasthan	1000 MW	Active	RRECL
Maharashtra	800 MW	Active	MSEDCL
Uttar Pradesh	750 MW	Active	UPNEDA
Madhya Pradesh	600 MW	Active	MPUVNL
Punjab	500 MW	Active	PEDA

Karnataka	400 MW	Active	KREDL
Gujarat	350 MW	Active	GEDA
Haryana	300 MW	Active	HAREDA

Application Process — Step by Step

Step 1 — Registration: Visit your state's nodal agency website or nearest Common Service Centre (CSC). Register with Aadhaar, land documents, and bank account details.

Step 2 — Site Survey: A technical team visits your land to assess solar potential, grid connectivity, and feasibility for the chosen component.

Step 3 — Project Sanction: Upon successful survey, the project is sanctioned with a DPR (Detailed Project Report). You receive a sanction letter with subsidy details.

Step 4 — Vendor Selection: Select an empanelled installer/manufacturer. Gautam Solar is an ALMM-approved manufacturer eligible under PM-KUSUM.

Step 5 — Installation: The installer completes the solar plant installation within the timeline specified in the agreement (typically 6 months).

Step 6 — Inspection & Commissioning: State DISCOM/nodal agency inspects the installation. Net meter is installed for grid-connected components.

Step 7 — Subsidy Disbursement: Subsidies are directly credited to your bank account after successful commissioning.

How Gautam Solar Supports PM-KUSUM Beneficiaries

- ALMM-approved modules ensuring government compliance and subsidy eligibility
- Dedicated PM-KUSUM project team to assist with documentation
- Fast installation timelines — typical projects completed in 45–90 days
- Post-installation O&M; support and monitoring
- Free site assessment for orders above 500 kWp
- Flexible payment terms aligned with subsidy disbursement schedule
